

Plumbing Maintenance Program

Our technicians will inspect, adjust, and clean your water heater, fixtures, and plumbing systems to keep them operating at peak efficiency.

Our preventive maintenance service and inspection can:

- lower utility costs
- extend the life of your equipment
- entitle you to a 10% discount on all labor and materials on plumbing service work for the entire year
- reduce repairs and emergency breakdowns by revealing potential problems that can be corrected before causing major plumbing repairs

Even if your system has no problems, our inspection makes sure that everything is working in the most efficient manner. Every drop of water or kilowatt saved helps the environment and saves you money.

Members will receive top-priority dispatching. You will not be charged overtime rates for emergency service. Commercial Service of Bloomington, Inc. has technicians available 24/7 to handle all plumbing emergencies. R&S Plumbing is a licensed partner of Commercial Service (CO89100209).

House

- Inspect the entire house for water and drain leaks (exposed only)
