Which AC is right for you?

One type or size doesn't fit all when it comes to choosing the right air conditioner for your home.

Pick features you care about most:

- Energy-efficiency
- Cost
- Reliable
- Environmental impact
- Noise level
- Temperature control

Get help from an expert to customize your needs to a product:

- Customize your needs to the right unit
- What SEER rating is right for your house
- What size AC is right for your home size
- Expert installation so it runs correctly

Types of AC units for homes

Portable air conditioners

- A mobile, self-contained unit
- Bit noisier than other units
- Typically only suited for rooms less than 500 square foot.

Window units

- Self-contained unit, placed in a window
- Comes in many sizes
- Best for one-story homes and smaller square footage

Split/ductless AC units

- Split, ductless system with two components—one inside, one outside the home
- Systems are fairly small and simple to install

Central air conditioning

- Premium option for your home
- Able to connect four rooms to one unit
- Manual control of individual room temperature
- Most quiet with optimal performance and comfort

What does **SEER** mean?

Seasonal Energy Efficiency Ratio (SEER) is an air conditioning efficiency rating

SEER = Savings

When choosing a new air conditioner, pay attention to SEER rating. Like miles per gallon in a car, the higher the SEER, the less energy you'll use to stay comfortable.

Take a look inside Trane's top performing AC unit

1. ComfortLink™ II Communicating Control Board and Unique Refrigerant Cooled Inverter Drive
Powers the compressor and controls communication between components to optimize your comfort and efficiency.

2. Climatuff™ Variable Speed Compressor
The heart of Trane TruComfort™ technology automatically adjusts itself while maintaining constant and consistent speeds that avoid temperature swings in the home. Trane tested, tried and true.

3. All-Alluminum Spine Fin™ Coil
Designed to enhance airflow and heat transfer while resisting corrosion and leaks, far better than traditional copper and aluminum coils.

4. Compressor Sound Insulator
Reduces operating sound for a quieter home environment.

5. WeatherGuard™ II Top
Attractive, durable polycarbonate for lasting protection and unique quality design.

6. DuraTuff™ Rustproof Basepan
Won't crack, corrode, rust or warp.

For every home there's an air conditioner that's perfect for you. For help choosing the right AC for your home, contact the experts at Commercial Service.
